How to apply for standard upgrade in existing registration number on CRS portal

 *Note: BIS has not yet issued the official guideline for IS/IEC 62368-1. Below are responses based on current understanding and precedents.*

Q1 When the same laptop model obtains BIS certification under IS/IEC 62368-1, will BIS issue a new R-number?

- ✓ It is **unlikely** that the same R-number will continue. As seen with the battery standard change (IS 16046), manufacturers received a **new R-number** under updated standards. We expect BIS will issue a new R-number for this standard as well.

Q2 Can we maintain two certifications (IS 13252 & IS/IEC 62368-1) during transition?

- ✓ The CRS portal is not yet ready for IS/IEC 62368-1 testing. You may continue to use the existing R-number under IS 13252 until **1st November 2028**. After this date, both IS 13252 and IS 616 will be withdrawn.

How to apply for standard upgrade in existing registration number on CRS portal (continued)

Q3 Once we start testing and certifying the laptop under the new standard, will we be required to withdraw the old IS 13252 certificate? If so, how do we continue selling the already-manufactured stock that carries the old marking and is certified only to IS 13252?

- ✓ As mentioned above, **IS 13252 will remain valid until 1st November 2028**. If you register the models under the new standard, a **new CRS number and a new R-number** will be issued for IS/IEC 62368-1. The registration under the old standard will be **automatically withdrawn by BIS after 1st November 2028**.
